### EXAMINER'S AMENDMENT

Claims 26-36 have been allowed over the prior art.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Kondoudis (Reg # 42,758) on January 9, 2002.

The application has been amended as follows: In claim 36, line 7, after "nanohole", insert -- wherein said anodizing is conducted while monitoring an anodization current and the anodizing of said film containing aluminum terminates when a reduction in said anodization current from steady-state value is detected;--

The following is an examiner's statement of reasons for allowance: Prior art could not be located that taught the use of steady-state anodization current.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ying et al., US Patent 6,231,744, teaches the making of nanowires using anodization under constant voltage conditions (claim 3).
